MZ523A – Mezzanine for MRT523, 12 Channel Passive Pass-through

**Key Features**
- Mezzanine module for MRT523
- Routes 12 analog inputs, 2 digital outputs, input clock, trigger in/out, three pairs of user defined digital I/O from rear panel to mezzanine connectors
- Direct connection on all analog channels, giving full performance of the ADC
- RoHS compliant

**Benefits of Choosing VadaTech**
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

The MZ523A is a mezzanine module for VadaTech’s MRT523. The AMC/MRT523 combination provides 12-channel ADC 16-bit @ 125 MSPS, and this mezzanine routes analog inputs to the ADC.

The MZ523A is intended primarily for system development/evaluation purposes. It provides no buffering or limiting of the input signals, so the user must ensure inputs are within +/-1 V to avoid damage to the ADCs.

The board implements a differential double balun on each mezzanine single ended analog input, as recommended by the AD9653 datasheet for optimum performance. Inputs have 50Ω termination to ground, and are then coupled to ADC inputs via a 0.4 to 800 MHz balun.

The MZ523A complies with the MRT523 Mezzanine Interface Specification, which can be made available to research partners to allow them to develop their own application-specific mezzanine modules.

<td>Standards</td>
<td>VadaTech is certified to both the ISO9001:2000 and AS9100B:2004 standards</td>
</tr>
<tr>
<td>Warranty</td>
<td>Two (2) years</td>
</tr>
</tbody>
</table>

#### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of ATCA and μTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTM), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.
