New AMC from VadaTech Has 1.8" Quad SATA III SSD Module with RAID

Henderson, NV – May 27, 2015 – VadaTech, a manufacturer of embedded boards and complete application-ready platforms, has announced a new Advanced Mezzanine Card (AMC) with four SATA III drives for nearly 2 TB of storage in one module.

The AMC623 is a mid-size, single module AMC. It can support RAID 0, 1, and 10 for striping and mirroring options. The four SATA III drives can provide a 6 Gbps data rate which is routed to the backplane via x2 PCIe lanes. The module is compliant to the AMC.1 specification.

VadaTech provides a wide range of storage modules and solutions. This includes 2.5" Solid State Disk (SSD), 1.8" SSD, RAID Controllers, single and dual drive modules, and various combinations of these types. The company also offers a full suite of high-performance processors, FPGAs, graphics, network interface, and other modules in various architectures.

About VadaTech

VadaTech provides innovative embedded computing solutions from board-level products, chassis-level platforms, to configurable application-ready systems. With a focus on MicroTCA and AdvancedTCA solutions, the company offers unmatched product selection and expertise in the full xTCA ecosystem. With our unique combination of electrical, mechanical, software, and system-level expertise, VadaTech can provide customized commercial or rugged computing solutions to meet the most complex customer requirements. VadaTech also offers specialized product solutions for VPX/VME, CompactPCI, and other architectures. A member of PICMG and VITA, VadaTech is headquartered in Henderson, NV with offices in Europe and Asia Pacific.
